RESEARCH HIGHLIGHTS	<ul style="list-style-type: none"> <li>• Investors in crowdfunded SCF adjust their views on guarantor reliability from loan repayments and act accordingly. This perception impacts investor reactions to factors like interest rate, affecting market efficiency and fundraising success.</li> <li>• Retailer-e-tailer partnerships can reduce competition when return handling and offline shopping costs hit specific thresholds. This reduced competition might lower consumer surplus, disadvantaging consumers.</li> <li>• With clearer online reviews, firms lean towards disclosing product quality due to changing consumer behavior. The firm’s selling scheme choice hinges on factors like commission rates, with a bias towards quality disclosure.</li> <li>• There’s evident information leakage around SEC filings, with stocks that surge before filing releases also rising post-release, and vice versa for declines. These price shifts aren’t due to momentum or past SEC technical issues, highlighting a new, previously unexplored 30-minute trend.</li> </ul>
